

## CLAIMS

What is claimed is:

- 1 1. A method comprising:  
2 receiving a plurality of streaming content description data about a plurality of  
3 streaming content;  
4 receiving a plurality of stored content description data about a plurality of  
5 stored content;  
6 providing a program guide including at least some of the streaming content  
7 description data and at least some of the stored content description data.
- 1 2. The method of claim 1 further comprising:  
2 receiving a request to present a selected stored content; and  
3 presenting the selected stored content.
- 1 3. The method of claim 1 further comprising:  
2 receiving a request to provide a plurality of details about a selected stored  
3 content; and  
4 presenting the details about the selected stored content.
- 1 4. The method of claim 1 further comprising:  
2 receiving a request to present a selected streaming content; and  
3 presenting the selected streaming content.
- 1 5. The method of claim 1 further comprising:  
2 receiving a request to provide a plurality of details about a selected streaming  
3 content; and  
4 presenting the details about the selected streaming content.

- 1 6. The method of claim 2 wherein presenting comprises:  
2 decrypting the stored content.
- 1 7. The method of claim 2 wherein presenting comprises:  
2 decompressing the stored content.
- 1 8. The method of claim 4 wherein presenting comprises:  
2 decrypting the streaming content.
- 1 9. The method of claim 4 wherein presenting comprises:  
2 decompressing the streaming content.
- 1 10. The method of claim 1 further comprising:  
2 receiving a content manager update.
- 1 11. The method of claim 1 further comprising:  
2 receiving a new content manager.
- 1 12. A system comprising:  
2 a coordinator to receive a plurality of streaming content description data about  
3 a plurality of streaming content;  
4 at least one content manager to provide to the coordinator a plurality of stored  
5 content description data about a plurality of stored content.
- 1 13. The system of claim 12 wherein the coordinator provides a program guide  
2 based on the streaming content description data and the stored content description  
3 data.
- 1 14. The system of claim 12 wherein the coordinator invokes the content manager  
2 to present a user selected content.

1 15. The system of claim 14 wherein the user selected content is one of the  
2 plurality of streaming content or one of the plurality of stored content.

1 16. The system of claim 12 wherein the coordinator comprises:  
2 a presentation component;  
3 a decryption component; and  
4 a decompression component.

1 17. The system of claim 12 wherein each content manager comprises:  
2 a presentation component;  
3 a decryption component; and  
4 a decompression component.

1 18. The system of claim 12 wherein the coordinator receives a new content  
2 manager.

1 19. The system of claim 12 wherein the coordinator receives a content manager  
2 update.

1 20. A computing device comprising a machine readable medium and a processor,  
2 the machine readable medium including instructions which when executed by the  
3 processor cause the processor to perform operations comprising:  
4 receiving a plurality of streaming content description data about a plurality of  
5 streaming content;  
6 receiving a plurality of stored content description data about a plurality of  
7 stored content;  
8 providing a program guide including at least some of the streaming content  
9 description data and at least some of the stored content description data.
